

WHAT IS CLAIMED IS:

1. A food utensil comprising:

a hollow body having an inner wall forming an interior and an outer wall,  
an open first end and a closed second end, and, a plurality of  
grooves each longitudinally extending from the first end to a  
corresponding plurality of points approaching the second end; and  
a plurality of blades extending across said interior.

2. The utensil of claim 1 further comprising a blade rack slidably  
engaged with said outer wall for attachment of said plurality of blades  
wherein each of said plurality of blades correspondingly extends through  
one of said plurality of grooves.

3. The utensil of claim 1 further comprising a base fixed to the  
closed second end.

4. The utensil of claim 1 wherein said plurality of blades comprise a  
plurality of wires.

5. The utensil of claim 2 wherein said plurality of blades comprises a  
plurality of wires wrapped about said blade rack.

6. The utensil of claim 1 further comprising a food receptacle  
removably attached to said first open end for holding a food product.

7. The utensil of claim 6 further comprising at least one hole  
extending through said food receptacle and at least one corresponding  
prong extending through said at least one hole for holding said food  
product.

8. The utensil of claim 1 wherein each of said plurality of grooves with respect to another equidistantly terminates between said first and second ends.

9. The utensil of claim 1 wherein said plurality of blades is fixed to said inner wall.

10. The utensil of claim 1 wherein said plurality of blades is fixed to said open first end.

11. A food utensil comprising:

a hollow body having an inner wall forming an interior and an outer wall, an open first end and a closed second end, and, a plurality of grooves each longitudinally extending from the first end to a corresponding plurality of points approaching the second end;

a plurality of blades extending across said interior; and

the utensil of claim 1 further comprising a food receptacle removably attached to said first open end for holding a food product.
